

The Able Difference: **EXPERTISE & EFFICIENCY**

Trust your critical metal parts to Able Electropolishing, where our reputation for excellence is built on more than six decades of innovation and collaboration with engineers across industries.

Since 1954, Chicago-based Able Electropolishing has been the leading provider of electropolishing and metal finishing services worldwide, providing reliable, high-quality results and exceptional customer satisfaction to customers in industries that include aerospace, medical manufacturing, food and beverage production, semi-conductor manufacturing and more.

SERVICES

ELECTROPOLISHING

PASSIVATION

PROTOTYPING
SUPPORT

A state-of-the-art facility, sophisticated process control systems, proprietary formulations and tooling, and robotic automation enable us to provide our customers with the most precise and consistent metal finishing results in the industry.

DISCOVER THE DIFFERENCE

Able will work with your team to develop prototype parameters that result in the highest quality finish for your product. Send us your part to electropolish for free and see the results firsthand.
